# Main Event

Plant & Soil Nutrients

## Main Event Dry Iron & Main Event Dry Manganese

are specifically formulated for the management of all turfgrass, horticultural and arborculture plants. The products contain nutrients that have been proven to aid and assist in the maintaining of color and growth of all turfgrass and horticultural cultivars and growth of soil "VAM", Vesicular Arbuscular Mycorrhiza.

The products also contain both soil and foliar penetrating surfactant systems to enhance plant uptake and bilateral movement in the soil profile.

# 100% Chelated Non-Staining VAM Sustaining

**For use on:** tees, greens, approaches, landing areas, fairways and sports turf. General nursery and greenhouse plant application and soil injection for trees.
